

Wakefield Roofing Color Palette

**Due to the variation in roof colors, all roof changes must be submitted for approval. Below are guideline sample colors:

Weathered Gray

The current board has been informed that Weathered Gray is available and does not need to be submitted to the ACC for approval since this is the same color that was originally installed on the homes when they were built. ****Updated 8/2013****

All Architectural Change Request forms for roofing must include a plot plan of your lot, detailed description of shingles and color sample.
